

Class Systems would like to wish you a very successful ICEF ANZA workshop.

Class is the world's leading administration software system for language schools. Every day, Class is used by over 1,500 people in more than 300 schools around the world including Kaplan Aspect and LSI in Australia, and Waikato, Kaplan Aspect, LSI, Christchurch College, English Language Academy and Seafield School in New Zealand.

All aspects of school management are integrated within one powerful system and the latest version of Class (Class SQL Version 6) will help you to manage student & agent bookings, pricing & invoicing, documentation, accommodation, transfers, teachers, classing & timetabling, attendance, accounting summaries and statistics & reporting. It is suitable for and is used by all types and sizes of language school, starting from single users through to large multi-national, multi-location school groups.

Class works seamlessly with Microsoft Excel and Word, and you can even communicate with students and agents directly from Class using both email and phone texting.

The latest development of Class administration system is Class Web; a web integration module that allows students and agents to check prices and availability, make bookings direct to your Class database, view their financial details and check the status of accommodation and flight transfers, all online.

Please do take a minute or two to have a look through the enclosed Class booklet and feel free to contact us with any questions you might have. It would also be our pleasure to give you an online demonstration to show you why Class is the most comprehensive software package for language school administration available today; just drop us a line and we'll arrange a time and date to suit you.

With kind regards,

The Class Systems Team
